## SOME IMPORTANT BANKING TERMS

**Asset turnover ratio** - This ratio can be explained as Net assets / Total turnover or sales. This ratio measures the operational efficiency of business assets. In simple terms this measures how many time total assets turned in a year and how efficiently the assets are used in a business.

**Amortization** - It is an accounting technique by which intangible assets are written off over a period of time. For example provision for doubtful debts or preliminary expenses are written off over a certain period of time.

**Audit** - Financial statement and physical stock is checked annually by professional auditor (Chartered Accountant affiliated by ICAI in India)

**Capital gain** - Gain by selling a capital asset in which a person is not doing business. Income by selling a house by a bank employee is a capital gain whereas when a builder do the same thing it is Income from business and professional.

**Current asset** - An asset that can be converted into cash with 12 months. For example - debtors, stock etc.

**Credit rating** - A ranking applied to an individual, business or a nation based upon its credit history and current financial position. There are various credit rating companies in India such as Crisil.

**CPI** - Consumer price index is measure to find price of a bundle of commodities. CPI is used to measure the inflation in a country.

**Depreciation** - Depreciation is reduction in value of an asset due wear and tear over a period of time. For example a company purchased a machine in 2005 and planned to charge 20% depreciation. In 2010 the machine will be written off from the books of account.

**Dividend** - Dividend is the amount per share paid by a company to its shareholders. Dividend value is based upon company's profitability

**GDP** - Gross domestic product is the aggregate value of goods and services produced by every person of a nation.

**GST** - Goods and services tax is the same tax system for everything. It is proposed that GST will replace the multi tax system in India by 2015.

**IPO** - Initial public offer is issue of stocks for the first time in the market.

**Intangible assets** – Assets which can't be seen but have value for business. For example – Goodwill.

**Indemnity** – A legal contract under which one party promises to pay another for any losses incurred to them by their acts.

**Interest rate risk** – Risk that value of financial assets will deteriorate because of fall in interest rate. For example value of bonds decreases with decrease in interest rate.

**Junk fund** – A fund which invests investor's money in junk investments means high risk investments which high returns.

**Monopoly** - A situation in market where there are many buyers but a single seller exist.

**Money market** - Market dealing in short term lending and borrowing of funds. Also know as Cash market.

**Monetary policy** - Set of actions by Central bank of a country ( RBI in case of India) to control the supply of money. These actions included increase in interest rate, open market purchases,

changing commercial bank's reserve funds ratio (SLR) etc.

**Marginal cost** - Additional cost to produce an extra unit of product.

**Margin** - Amount of profit added to cost price of each unit of a product

**Margin call** - Margin call term is used in two situations. **First** - Whenever a lender gives a secured loan and loan value is a fixed percentage of loan then whenever the value of security decrease below the decided ratio then lender given a margin call to borrower to bring loan to security ratio to decided level. **Secondly** in stock exchanges traders trades in various securities by paying 20-30% of the value of securities. Whenever the value of security goes below that margin, broker gives margin call to trader to bring the margin to desired level.

**Mark-to-market** - As explained above while defining margin call, value of assets in case of securities is measured on daily basis. If the trader's asset value increased, increased value is transferred to his account. In case the value of assets decreased margin call is made to adjust the margin.

**ROI** - Rate on investment is return divided by value of investment

**Redemption** - Maturity date of a security or a bond

**Recession** - An economic situation of negative growth

**Repo rate** - Rate at which Central bank (RBI in case of India) lends money to commercial banks

**Reverse repo rate** - Rate at which commercial banks lends to central bank
